

Unidrive M General Purpose Drives M101, M200, M300

Simple set up. Built to last.

0.25kW – 132kW (0.33hp to 175hp)
100V | 200V | 400V | 575V | 690V

CONTROL TECHNIQUES™

Nidec
— All for dreams

We're here when you need us.

"Control Techniques technicians always address problems quickly and comprehensively. This means a lot to a business such as ours, and is certainly better than we have experienced elsewhere."

- OEM, Offshore, America

All about motor control

We have over 40 years' experience developing drives. Over that time, we've kept close to our customers. This has led us to design intuitive, reliable drives, matched with performance that will keep your equipment moving.

Drive solutions designed with OEMs in mind.

Never be without a solution

You may want support throughout a project, or enjoy the peace of mind knowing someone is here to help if you need it. Our goal is to make it easy for you tap into specialist knowledge, helping to take some of the pressure off your design team.

We help solve your real world problems.

Stock when you need it

If you work to Just in Time (JIT) methods, or even if not, you'll want to know that we have stock when you need it. We call this service Express Availability. It means we guarantee you despatch within 24-hours.*

** Conditions apply, request our Express Availability brochure for more information*

A world of experience

We are not just a local agent. We're a global business with shared knowledge of drive applications across every industry: a central Engineering and Design department; 40+ Automation Centres; the Nidec network of over 400 companies.

We've got you covered for everything that moves and spins.

An enhanced global presence that benefits all our customers

Through our integrated Drives & Motors organization, we have an extensive global presence that provides comprehensive local support and services. This includes:

 5,500 employees

40+ Automation Centers

Providing excellent customer support for any product, automation solution or service requirements

23 Manufacturing sites

Producing a comprehensive range of high quality products, optimized for industry-specific customer requirements

8 Engineering and Design facilities

Developing market leading products and feature-sets using the latest design technology

3 Regional despatch hubs

For quick delivery of product

Our extensive sales and service networks in Europe, Asia Pacific and the Americas are backed-up by hundreds of carefully selected distributors and service partners, often in remote locations, all over the world.

Drives designed for OEM automation

From the moment they're switched on,
our drives are ready to go.

Simple to set up. Accurate. Flexible to your needs.

Type	M101 Base	M200 Standard	M300 Safety
Ideal for	Simple automation processes	Automation processes requiring additional control and fieldbus connectivity	Automation processes requiring additional control, fieldbus connectivity and safety control
Typical applications	Frequency control for conveyors, fans, pumps and mixers	Speed control for conveyors, fans, positive displacement pumps and mixers, where their functions are controlled remotely via fieldbus or Ethernet communications	Speed control for material transport, cutting, woodworking, machine tools, applications where protection of people or assets is required
			
Voltage range	100 – 400 VAC	100 – 690 VAC	
Power range	0.25 – 7.5 kW	0.25 - 132 kW	
Communications	-	Options: Ethernet PROFINET EtherCAT PROFIBUS CANopen DeviceNet	
Key features	- Fast set-up - Simple V/Hz control - Potentiometer parameter control - Potentiometer speed control	- Fast set-up - Advanced RFC mode for enhanced control	- Fast set-up - Advanced RFC mode for enhanced control - SIL3/Ple conformity - Dual channel safe torque off (see p15)
Drive comparison			
Onboard Potentiometer	✓		
Open loop vector or V/Hz	✓	✓	✓
Open loop rotor flux control (RFC-A)		✓	✓
Analogue Inputs / Outputs	1/0	2/1	2/1
Digital Inputs / Outputs / Bidirectional I/O	3/0/1	4/0/1	4/0/1
Relay Output ¹	1	1	1
Safe Torque Off			2

Cloning via SD card ⁴	✓	✓	✓

¹ Configurable

² Requires Machine Control Studio (free download)

³ Requires AI-485 Adaptor

⁴ Requires AI-Backup Adaptor

Easy set-up. Reliable performance. Built to last.

No specialist knowledge required

Designed to make set-up as simple as possible. In fact many applications require changing just a few settings. Adjustments are easy with the keypad and clear referencing guide.

Fast set-up

For fast, batch production, parameters can be transferred onto new drives using standard SD cards. You'll need either the optional AI-Backup module or AI-Smart Adaptor and 24V.

You can find all parameters (Pr) for quick motor setup on the front of the drive, and be up and running within seconds.

1. Set motor rated current (Pr 06)

2. Set motor RPM (Pr 07)

3. Set motor voltage (Pr 08)

4. Set motor power factor (Pr 09)

Clear and concise start up guide

For first time users, our drives come with a step by step guide. This provides everything you need to know, in a clear and concise way.

Additionally, our quick-start webpage features 'how to' video guides and technical information. You can access the information at:

www.drive-setup.com

Quickly diagnose faults

In the unlikely event that you return an error from the drive, our Diagnostics Tool app is free to download. It's available for Apple, Android and Windows operating systems. Just input the error code on your device and you'll be given a solution. You can download our Diagnostics Tool App at:

www.controltechniques.com/mobile-applications

Small form, easy install

Unidrive M drives are amongst the smallest in their class, ideal for machine builds where size matters.

Minimize downtime with robust and reliable drives

Control Techniques is built on 40 years of drive knowledge. We make reliable drives that are designed to keep machines running, even in harsh environments. They meet international standards IEC60721-3-3 3C3* and EN60068-2-60 Meth 4.

Our drives provide extensive protection from the three main causes of field-failure.

** Up to frame size 4*

Ingress

Poorly designed drives result in premature failure and shortened service life. We protect our drives with a range of features, which include:

- Conformal coated PCBs – for increased resilience to moisture, dust, chemicals and temperature extremes
- Patented air flow system – efficiently cools drives while protecting internal components from degradation
- Ingress protection up to IP21 – UL open class (NEMA 1) compliant
- On larger drives, higher IP ratings can be achieved with through panel mounting in cabinets

Electrical

Power infrastructure can vary from country to country. Our drives technology manages that variation, so you can export your products with peace of mind.

- Wide supply voltage tolerance – keeps equipment running within their specified tolerances, even when power supplies are variable. This prevents the drive tripping out.
- Trip avoidance – removes the risk of expensive mid-process breakdowns associated with demand fluctuations or brownouts. Designed in protection against:
 - > Load shedding – line speed is reduced to match the change in current
 - > Brownouts – power supply loss ride-through prevents stoppage, achieved by regenerating power from the motor and load inertia

Temperature

We design our drives to run in varying operating conditions. Features include:

- Adjustable rating – drives can be derated, enabling them to run in higher temperature environments
- Intelligent three speed, easy-change fan – auto adjusts to achieve optimum performance of drives. The easy-change fan helps reduce maintenance downtime and maximizes fan lifetime.

Our commitment to reliability

Quality management is part of our daily lives.

For many of our customers, ISO 9001 is a prerequisite. That means we maintain consistency of production by following strict principles.

Every product goes through a series of tests throughout the production process. The parts we use come from a fixed supply, so they conform to our test requirements. Most importantly, we support our staff through rigorous training and ensure full traceability. This ensures the highest standards of quality throughout our factories.

Maximize productivity with accurate motor control

“Our design team is always looking to push the boundaries in terms of machine performance. The team thought that they had reached the limits with 26 cycles per minute; with the Unidrive M we increased this to 30.”

- OEM, Packaging, Italy

Our unique motor control algorithm, RFC-A mode, allows your drive to achieve current loop rates as low as 125µs. The rate represents how fast the drive updates the current. At this low value, we're able to maintain more control. This means our drives can achieve dynamic acceleration with a high overload capability of 180% for 30 seconds and 150% for 60 seconds. When running at low speeds, RFC-A mode can achieve accurate speed holding.

Motor control modes include:

Control Mode	Features
Open loop vector or V/Hz induction motor control	Reliable performance and easy configuration: • 100% torque available down to 1 Hz • Slip compensation • Multi-motor control • Square law V/F mode • Dynamic V/F mode
Enhanced Open Loop Rotor Flux Control for induction motors (RFC-A) (M200/M300 only)	When the load changes, RFC-A mode stabilizes the running speed of the drive. It also prevents drive trips at start up.

To achieve accurate speed control we offer several ways to pair your drives with AC induction motors. These include:

1. Clearly laid out keypad with 'quick set-up' parameter guide on the front panel – find and modify input parameters without any technical knowledge
2. Two autotune procedures (stationary and rotating) - optimized motor setup
3. Unidrive M Connect software tool – a complete motor database and set-up wizard (M200/300 only)

Energy Saving

Variable costs, such as those associated with energy usage, impact on profits. So we've included a range of features to reduce operating costs, benefits you can pass onto your customers. These include:

Low power standby mode - drives can sit idle for significant periods, saving energy

Automatic 3-speed cooling fan - keeps energy usage and acoustic noise to a minimum by intelligently responding to load and the environment

Square law V/F mode - optimized for quadratic loads like pumps and fans to reduce motor losses

Dynamic V/F mode - keeps energy usage and motor losses to a minimum in low load conditions.

Unidrive M is 98% efficient - only 2% of energy is lost during the conversion process

Flexible connectivity. Easy commissioning. Enhanced control.

Integrate into any system*

We offer a variety of option modules suited to a range of communication protocols. This makes it easier to retrofit our drives without changing your whole system.

The module options include SI-Ethernet, SI-EtherCAT, SI-PROFINET, SI-PROFIBUS, SI-CANopen and SI-DeviceNet. The AI-485 Adaptor option can also connect to EIA485 / Modbus RTU networks.

* M200/M300 only

Intuitive commissioning software

For many applications, access to parameters through a keypad isn't enough. Our Unidrive M Connect configuration tool is designed to commission, optimize and monitor drive/system performance. It feels natural to use, and is packed full of useful features, such as:

Easy to navigate, Windows based interface

Cloning – for the fast reproduction of drive parameters, including the import of Commander SK files from our legacy drives

User-friendly graphical tools to enhance data analysis

Customizable screens – call up multiple parameters into one work area

Dynamic drive logic diagrams – visualise and control the drive logic in real-time

Automatic RTU baud rate scanning – finds drives on the network automatically

Download Unidrive M Connect for Windows at: www.controltechniques.com/unidrivemconnect

Advanced Machine Control

Increase functionality with onboard PLC, and safety option

More control, less cost

If you're using an external PLC in your machinery, you'll know that extra functionality comes at a price.

External PLCs and the connecting cables all adds to the BOM cost. Then consider the lost time installing those extra components. Plus there's the cost of holding extra stock items. That's why we've added internal PLCs to our M200 and M300 general purpose drives. This offers a huge opportunity for savings at no extra cost.

Examples of applications using PLCs include:

Intelligent pump control

Washing machines

Entry barriers

Our PLC is controlled by our own IEC 61131-3 fully compliant programming environment. Machine Control Studio

* For more information see our OEM PLC brochure.

Integrated safety system*

Unidrive M300 provides a cost effective approach to safety. It features a dual Safe Torque Off (STO) input, certified to SIL3/PLe safety rating and compliant with EN/IEC 61800-5-2.

As all the work is done inside the drive, no additional parts are needed. When a machine trips, the STO stops the motor from producing torque, preventing accidental start up. A simple solution to a serious problem.

* M300 only

Key:

Part number selector

1. Select voltage from the first column in the table below
2. Select required duty and power from the top two rows
3. Find part number

AI-Back-up adaptor

Provides SD card usage for programming/cloning

SI-Ethernet module

Supports Ethernet/IP, Modbus TCP/IP, web pages

Options and accessories

Unidrive M100

Optional accessories	Order code
AI-Back-up Adaptor: Port adaptor for SD card parameter cloning, and an input for 24 V back-up 	82500000000004
AI-Smart Adaptor: Built-in memory for parameter cloning and 24 V backup 	82500000018500

Unidrive M200 and M300

Select options:

Optional keypad	Order code
Remote Keypad: Remote mountable, intuitive plain text, multilingual LCD keypad for rapid set-up and superior diagnostics (using the AI-485 adaptor along with a comms lead). Rapid and secure panel fit with 1 x 32 mm hole rated to IP66 (NEMA 4). 	82500000000001
Remote keypad RTC: The keypad is remote mountable, allowing flexible mounting on the outside of a panel (meets IP54/ NEMA 12). Three line plain text, multi-language LCD keypad for rapid set-up and helpful diagnostics. Battery operated real-time clock allows accurate time stamping of events, aiding diagnostics. 	82400000019600

Optional accessories	Order code
AI-Back-up Adaptor: Port adaptor for SD card parameter cloning, and an input for 24 V back-up 	82500000000004
AI-485 Adaptor: Adaptor that allows the drive to communicate via RS485 	82500000000003
AI-Smart Adaptor: Built-in memory for parameter cloning and 24 V backup 	82500000018500
RS485 cable: The USB comms cable allows the drive to connect to a PC for use with Unidrive M's PC tools. 	82500000018500
AI-485 24 V Adaptor: Adaptor with 24 V input 	82500000019700

Option modules (available from frame size 2 and upwards)	Order code
SI-EtherCAT: EtherCAT interface module 	82400000018000
SI-PROFIBUS: PROFIBUS interface module 	82400000017500
SI-Ethernet: Ethernet module supports EtherNet/IP and Modbus TCP/IP 	82400000017900
SI-DeviceNet: DeviceNet interface module 	82400000017700
SI-CANopen: CANopen interface module 	82400000017600
SI-PROFINET: PROFINET interface module 	82500000018200
SI-I/O: extended I/O interface module to increase the number of I/O analog and digital points on a drive 	82400000017800
Software	Order code
Unidrive M Connect: the Unidrive M Connect PC tool is for commissioning, optimizing and monitoring drive/system performance. 	Available for free on controltechniques.com

Select accessories:

Optional external EMC filter:

Unidrive M's built-in EMC filter complies with EN/IEC 61800-3 External EMC filters are available for when compliance with EN/IEC 61000-6-4 is required

Environmental safety and electrical conformance

- **Size 1 to 4:**
IP21 / UL open class (NEMA 1). IP20 when the AI Adaptors are fitted.
UL TYPE 1 compliance requires the appropriate conduit kit to be fitted.
- Ambient temperature -20 °C (4 °F) to 40 °C (104 °F) as standard.
60 °C / 140 °F with derating for frames 1-4.
- **Size 5 to 9:**
IP20 / UL open class (NEMA 1). UL TYPE 1 compliance requires the appropriate conduit kit to be fitted.
IP65 / UL TYPE 12 rating is achieved on the rear of the drive when through panel mounted (9E is IP55).
- Ambient temperature -20 °C (4 °F) to 40 °C (104 °F) as standard. 55 °C / 131 °F with derating for frames 5-9.
- **Applicable to all:**
 - Storage temperature -40 °C to 60 °C (-40 °F to 140 °F).
 - Humidity 95 % maximum (non-condensing) at 40 °C (104 °F) in accordance with EN/IEC 60068-2-78 and ANSI/EIA-364-31.
 - EN/IEC 60068-2-60, Method 4 Corrosive gas.
 - Altitude: 0 to 3000 m (0 to 9843 ft), derate 1 % per 100 m (328 ft) between 1000 m and 3000 m (3281 ft and 9843 ft).
 - Random Vibration: Tested in accordance with EN/IEC 60068-2-64 with SI and AI option modules fitted.
 - Mechanical Shock: Tested in accordance with EN/IEC 60068-2-29.
 - Electromagnetic Immunity complies with EN/IEC 61800-3 and EN/IEC 61000-6-2.
 - With onboard EMC filter, complies with EN/IEC 61800-3 (2nd environment).
 - EN/IEC 61000-6-3 and EN/IEC 61000-6-4 with optional footprint EMC filter.
 - EN/IEC 60146-1-1 Supply conditions.
 - EN/IEC 61800-5-1 Electrical Safety.
 - EN/IEC 61131-2 I/O.
 - UL 508C Electrical Safety.
